Document Tier 2	<i>Global Policy</i>	

### APPENDIX A – Quality Policy

Infinity Laboratories is committed to providing superior microbiological and chemical testing to the medical device and pharmaceutical industries that complies with the requirements of regulatory standards and guidelines. The aim of the organization is to continually improve the effectiveness of the Quality Management System (QMS) with respect to testing, as well as enhance customer service.

Management pledges to maintain good laboratory practices and operate in an ethical and legal manner. The organization will treat all customers fairly, and with honesty and integrity.

Infinity Laboratories is constantly striving for improvement in all aspects of its operations. The QMS is constantly reviewed for passing acceptance criteria and laboratory performance.

All testing personnel are trained and familiar with Infinity Laboratories quality documentation and the implementation of these policies and procedures. Management will provide and uphold a working environment that promotes good habits, positive attitudes, cooperative teamwork, and helpful customer service.

It is the policy of Infinity Laboratories that testing will always be carried out in accordance with stated standardized methods and/or our client’s requirements in regards to the scope of its activities and comply with the international standard ISO/IEC 17025.
